

1. Alo Viso

Launching at EuroLuce, Viso's Alo is a sleek LED pendant made of frosted glass with clear accents. The frosted glass acts as a diffuser to soften the light output. Alo features a plated metal stem, offered in two sizes, and is available in numerous finishes including mirrored silver and hairline bronze.

2. Praha Lasvit

Praha by Stanislav Libenský will be shown as part of Lasvit's EuroLuce exhibition, 'Laterna Magica', which builds on the mutual relation between objects, light and space. At the same time, Lasvit will also introduce new collections created in collaboration with Zaha Hadid, Kengo Kuma, Ed Ng & Terence Ngan, and Yabu Pushelberg.

4. Buchi Knikerboker

Inspired by Shakespeare's quote from Julius Ceasar: "The skies are painted with unnumbered sparks", Knikerboker's new collection Buchi is made of steel covered with different paintings and leaves. Beyond its galactic appearance, the electric supply is composed by COB LED and dimmable power supplies are available.

5. Arbor Icone Luce

Arbor is created from linear elements gathered in order to create a stalk of light. The light comes from simple lines and circles and they give life to an aesthetic and lighting concept which represent both an aesthetic and a luminous element. Arbor is available in white, gold aluminium, silver, light grey and copper.

6. Sol 03 Luceplan

Designed by Daniel Rybakken, Sol 03 is a pendant light that occupies a large physical space with minimal physical volume. A translucent white film or a metallised mirror membrane is stretched inside a circular aluminium profile. A powerful light source projects a beam onto a large disk, either diffusing or reflecting the light.
